III. Student Success Framework – Russell Uyeno
a. Jeffery Arbuckle discussed a Quick Facts sheet that IR compiled showing where Honolulu CC transfer students go. The top five institutions are in the UH system. The data comes from the National Student Clearing House. The next project is to look at what courses students take once they transfer. There was one suggestion to analyze where students come from who are transferring into our college. The data sheet is available at http://www.honolulu.hawaii.edu/ppir under Quick Facts.

b. Russell attended a Hawai‘i Data eXchange Partnership (DXP) meeting that took place on April 8. The DXP is a statewide cross-agency, longitudinal data system that links information from infancy through early learning, K-12 and postsecondary education, and into the workforce.

c. Russell presented a key page from the meeting showing how Farrington (our feeder high school) has improved over the past four years from 2011. The school has improved its on-time graduation rate, its AP test and Dual Credit student success rates, and those going on to college.
