Training & Exercises:

Objective: Develop emergency management training/exercises plans for administration and personnel. Plans should include time line, training/exercise objectives, and evaluation means.

Discussion Questions:

1. Who should be trained on emergency management?
   Everyone from administration to students. Each area

2. What are the training methods for each group of personnel and how often?
   Under the (NIMS) National Incidents Management Systems, listed on line, for many NIMS related courses that may be conducted in the classroom. Introduction to National Response framework, basic ICS for operational first responders.

   Training methods include classroom instructions, tabletop exercises, role-playing, drills, etc.

   We need to refer to the 5 years NIMS training includes:
   - Sequence of goals
   - Objectives
   - Action items, it translates the functional capabilities
   - Core competencies
   - Training
   - Personnel qualifications
   - There's so many, long process.

3. What should be the contents of training for each group of personnel?
   NIMS create a standardized framework (same for everyone) tailored to each individual area.
   The guidelines but also have the flexibility to adapt training to fit i.e. mental health.

4. How will the training be evaluated and who will conduct the evaluation?
   Construct calendar
   Setup plan to achieve activities
   1) What worked well
   2) What didn't work
3) Playing the devils advocate (to test the structure of the original suggestion) what if scenarios.
4) List notes
5) Improve each time with a cut and paste method.
6) It will be never ending, continual process of improvement.
7) Accept all ideas keep it non-confrontational.
