Faculty and Lecturers,

It has been brought to the attention of the FSEC that some faculty may be using Laulima for their Student Evaluations of Instructors. After much discussion, the FSEC does not approve of the use of Laulima for Student Evaluations of Instructors. That system does not maintain the confidentiality of students, and thus affects the ratings and comments.

The FSEC does endorse the use of either eCafe or the Scantrons for Student Evaluations of Instructors. The Administration will continue to support the Scantron format.

Confidentiality of student responses is critical to ensure quality evaluations, including comments. Please keep this in mind when selecting an evaluation method.

Thank you.

Faculty Senate Executive Committee
